

STAINLESS STEEL DRINKING FOUNTAINS

To reduce the number of plastic bottles

Refs. 180100, 180110, 180820, 180800

Over-consumption of plastic bottles

In average, a person in the UK uses 3 plastic water bottles a week – that’s more than 7.7 billion of plastic water bottles in the UK per year. Unfortunately, only a fraction of these plastic water bottles is recycled, ending up in rivers and seas. “If just 1 in 10 Brits Refilled just once a week, we’d save around 340 million plastic bottles a year.” www.water.org.uk

Refill campaign, from City to Sea

The best way to reduce this over-consumption is to use refillable water bottles. To achieve this, it is essential that public spaces have the right equipment to refill them.

In 2015, only 20% of people in the UK used refillable water bottles, thanks to the Refill campaign from City to Sea, in 2023 we are now at 60%.

Launched in 2015, Refill is a campaign helping people find places to eat, drink and shop with less plastic. By using their free app, it shows us locations in the UK providing free tap water to refill our bottles in cafes, restaurants, museums, local authorities, shops, etc. The goal is to reduce single-use plastic bottle waste and improve access to quality drinking water.

According to their website site, 330,000 refill stations are listed on the app. Source: <https://www.refill.org.uk/>

A complete range of drinking fountains

DELABIE offers a wide range of drinking fountains to help equip public and commercial buildings.

DELABIE drinking fountains are made from stainless steel, a recyclable material that contributes to sustainable development.

304 stainless steel is resistant to intensive use and vandalism (unbreakable), as well as being very light, an important factor when it comes to installation. Well-established in hospitals and professional kitchens, stainless steel is essential when it comes to hygiene, thanks to its bacteriostatic nature.

The smooth surfaces and rounded edges of these water fountains means there are fewer niches where bacteria can develop, and they are easier to clean.

DELABIE drinking fountains feature a perforated flat-grid waste with no screws. This means that they are easy to clean, and also that they are able to withstand vandalism. They are supplied with a tap that shuts off instantly, which also has an adjustable flow rate.

DELABIE stainless steel drinking fountains are available in a number of variants to suit your needs:

- wall-mounted or floor-standing models
- models with a bubbler or a swan neck tap for filling water bottles efficiently.

Ref. 180800: Wall-mounted SD drinking fountain with bubbler

Ref. 180810: Wall-mounted SD drinking fountain with swan neck tap

Ref. 180820: Wall-mounted SD drinking fountain with bubbler and swan neck tap

Ref. 180100: Floor-standing ILHA drinking fountain with bubbler (height 915mm)

Ref. 180110: Floor-standing ILHA JR drinking fountain with bubbler (height 800mm)

PRODUCT BRIEF / STAINLESS STEEL DRINKING FOUNTAIN

To reduce the use of plastic bottles, DELABIE offers a wide range of stainless steel drinking fountains. Fitted with a bubbler or a swan neck tap, wall-mounted or floor-standing, DELABIE drinking fountains are ideal for drinking water while reducing the use of plastic.
