

2026 MUUZ INTERNATIONAL AWARD WINNER: TEMPOMATIC DUAL CONTROL WC FLUSH VALVE

The TEMPOMATIC Dual Control flush plate (Ref. 464050) has won a 2026 Muuz International Award in the 'Interior Equipment' category.

The Award

The Muuz International Awards (MIAW) are organised by Muuz, in partnership with "d'a" magazine. Each year, they recognise the most outstanding products in architecture, interior design and decoration.

They highlight the most creative manufacturers and raise awareness for the new products selected. To identify the 2026 winners, the Muuz editorial team assessed more than 350 new products.

The products were evaluated according to four main criteria: design, originality, usability, and technical aspects.

The Product

The TEMPOMATIC Dual Control recessed flush system reinvents public washrooms through a combination of hygiene, water savings and contemporary design. With its matte black finish, it adds a touch of elegance while meeting the requirements of buildings open to the public.

Thanks to its dual electronic and mechanical control system, the WC pan is flushed between each user. The flush can be activated by simply waving a hand or pressing the button. If the user forgets to flush, an automatic flush is activated before the next user arrives. An integrated duty flush automatically refreshes the water in the pipes after 24 hours of inactivity, limiting the risk of bacterial proliferation.

With no need for a cistern, the TEMPOMATIC Dual Control eliminates the risk of leaks and reduces the amount of water consumed considerably. Its intelligent system optimises the volume for every flush, providing the perfect balance between performance and resource preservation.

This stainless steel flush plate, featuring a matte black finish, impresses with its minimalist design and exceptional durability. Concealed fixings reinforce its resistance to vandalism, while a waterproof housing simplifies installation and maintenance.
