

A TOUCH OF INNOVATION, ZERO CONTAMINATION

The 2664T1 sequential mechanical basin mixer

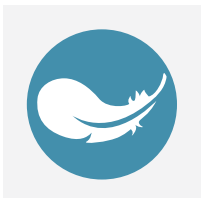

Sequential: opens/closes with cold water

Thermal shock without removing the lever

Maximum hygiene: controls biofilm

No manual contact: Hygiene lever

DELABIE ref.: 2664T1

Designed for healthcare facilities, DELABIE would like to present its new 2664T1 sequential mixer. It combines hygiene and safety, reduces bacterial proliferation, prevents the risk of scalding, and allows thermal shocks without shutting off the cold water. And, thanks to the sequential cartridge, it is simple to operate.

Optimise hygiene on a daily basis

DELABIE's 2664T1 sequential mixer reduces bacterial development drastically thanks to its swivelling spout and tube with a smooth interior; there are no niches where biofilm can develop. Its low water volume limits water stagnation and reduces the risk of bacterial development. Thanks to sequential technology, hygiene is controlled perfectly: no cross-flow between the hot and cold water. Goodbye to non-return valves and hello to optimised hygiene.

This mixer not only improves washroom safety, but it also simplifies maintenance, making it easier to check that it is working properly. A reliable ally for healthcare facilities, where attention to detail counts.

Anti-scalding safety at your fingertips

Designed for healthcare facilities, DELABIE's 2664T1 sequential mixer shines a spotlight on safety. Its anti-scalding feature limits the hot water temperature thanks to a pre-set temperature limiter. Its smart, sequential control opens with cold water before delivering warm water. The result? There are no surprises due to a previous user leaving the temperature setting too high, providing peace of mind for even the most vulnerable user.

Comfort in your hands

As well as ensuring high standards of hygiene and safety, the 2664T1 sequential mixer provides comfort for the user when washing their hands.

It is easy to turn on the mixer using the Hygiene lever without the need for manual contact, thanks to the sequential technology.

This ergonomic control lever is easy for anyone to operate: hospital patients, elderly people, disabled people and especially nursing staff.

With a drop height of 160mm, the 2664T1 mixer is ideal for efficient hand and/or forearm washing before treatment, even when a BIOFIL point-of-use filter is installed.

In terms of practicality, it ticks all the boxes: a sequential ceramic cartridge for fluid movement, a hygienic control lever that can be operated without manual contact, and the possibility of undertaking a thermal shock without removing the control lever. This mixer is the ally of choice for healthcare staff and healthcare facilities.

Design and efficiency

This BIOSAFE mixer combines technology and hygiene, with a sequential mechanism which allows precise control of the water flow and temperature, while minimising the risk of contamination. Its modern and ergonomic design fits perfectly into professional environments, offering both comfort and safety. Made from durable materials, it will withstand intensive use and it is easy to maintain.

PRODUCT BRIEF/ THE 2664T1 SEQUENTIAL MECHANICAL BASIN MIXER

A touch of innovation, zero contamination. This sequential mechanical mixer does not compromise on hygiene. Firstly, a suitable lever which can be operated by an elbow or a wrist. Secondly, bacterial proliferation is a distant memory, thanks to its spout with a smooth interior and its low volume of standing water in the body. Thirdly, a drop height which is suitable for fitting an anti-Legionella point-of-use filter. All without the risk of scalding thanks to the sequential mechanism. And the bonus item? A designer finish in chrome-plated brass. Job done.

DELABIE, manufacturer's expertise

DELABIE, a 100% family-owned French company, founded in 1928, is the European market leader in water controls and sanitary equipment for public and commercial places. The company offers five product ranges specifically for this market: Commercial water controls, Hospital water controls, Accessibility and Hygiene accessories, Stainless steel sanitary ware and Specialist water controls. Over 2,000 DELABIE manufactured items, including international references, are exported from its factory in France to more than 90 countries. The company has 10 subsidiaries worldwide: Germany, Austria, Belgium, the Netherlands, United Kingdom, Spain, Portugal, Poland, United Arab Emirates (Dubai) and China (Hong-Kong). For many years, DELABIE has placed ecological concerns at the heart of its philosophy, offering products that are as stylish as they are responsible and sustainable. For our facilities, production methods, dematerialization, packaging, employee commitment... DELABIE is proud to have received the ECOVADIS gold medal in 2024.
