

**WATER REGULATIONS
ADVISORY SERVICE**

TMV3 SCHEME

All sanitary fittings that deliver water from a public mains water supply must comply with the Water Supply (Water Fittings) Regulations (1999) or Scottish Byelaws.

These fittings must be of an 'appropriate quality and standard' and must not contaminate the water or cause wastage.

Products that are WRAS approved demonstrate this compliance and are recognised by all water suppliers in the UK.

The TMV scheme is an independent third party approval scheme administered by BuildCert. The scheme certifies that Type 3 thermostatic mixing valves conform to performance requirements of the NHS specification DO8 in Healthcare and Commercial applications in the UK.

BuildCert also certifies Type 2 thermostatic mixing valves destined for use in domestic applications to ensure the safe use of hot water in domestic premises.

ACS

ACS : "Attestation de Conformité Sanitaire." All DELABIE products comply with the French CPDW directive and the 29 May 1997 decree modified by the Ministry of Health DGS/SD7A2002 number 571 of 25 November 2002.

CE Certification

for electronic taps and valves: directives 2014/30/UE and 2014/35/UE.

NF EN certification:

French and European standards
NF EN 816;
NF EN 817;
NF EN 1111.

ISO 9001

2008 certification:
by DEKRA.

Other foreign certification:

DELABIE export to more than 80 foreign countries.

WHAT IS THE NF MARK?

The NF mark affixed on a product attests that the latter complies with the relevant standards and with complementary technical specifications requested by the market.

The characteristics are specified in the technical documents, prepared with the participation of the manufacturers, the distributors, the consumer associations, the laboratories and the public authorities, fixed by AFNOR Certification ("Association Française de Normalisation" - French Association for Standards) and monitored by CSTB ("Centre Scientifique et Technique du Bâtiment" - Scientific and Technical Building Centre).

• SANITARY FITTINGS

CSTB carries out tests on the products and audits the companies as part of this application. The technical rules for certification concerning sanitary fittings are numbered 077.

WHICH PRODUCTS CARRY THE NF MARK?

The NF Mark is displayed on the following products and specifies the ratings for some of them:

• SANITARY FITTINGS

- Mixers and taps
- Thermostatic mixers
- Flow restrictors
- Flexible shower hoses
- Drainage devices
- Self-closing taps
- Stopcocks installed: upstream of a sanitary water control on a cistern; to supply washing machines
- Multi-way switches
- Automatic inverter family type H or C
- Taps with automatic opening/shut-off.

HOW DOES ONE RECOGNISE AN NF PRODUCT?

To distinguish products that have been admitted to the NF Mark in the shops and during installation, the NF logo is affixed on the products themselves.

WHAT DOES THE NF MARK ACCORD?

The NF Mark is displayed on the following products and specifies the ratings for some of them:

• SANITARY FITTINGS

The NF Mark - SANITARY FITTINGS certifies the compliance of products with the certification rules NF 077 approved by AFNOR Certification. It confirms the general aspect, resistance to corrosion, interchangeability, durability, etc. The actual performances of the water controls are specified in each classification.

> For valves with automatic shut-off

Reducing the risk of water waste, these valves are mainly used in public or commercial places. Nowadays, these valves are available for simple taps, mixers and urinal valves. These water controls can withstand 500,000 operations. The NF 007 also guarantees:

- quality of the surface covering
- interchangeability of valves
- waterproofness before and after endurance test
- intercommunication between cold water and hot water
- flow rates appropriate to the application
- checking the flow time
- mechanical performances
- wear resistance for the moving parts
- acoustic performances.

NF MARK, SANITARY FITTINGS

According to NF regulations for sanitary fittings, DELABIE is authorised to label those products that conform to the French and European standards EN 816: taps/valves with automatic shut-off with the NF logo.

Decision no. 341-M1-17/2 of 24 March 2017
This decision is pronounced in the light of the results of the internal audit of the business, these have been confirmed by the tests undertaken by the CSTB and those undertaken in the CSTB laboratory. It cancels and replaces all previous decisions. AFNOR reviews the right to use the NF logo at least once a year, and either change or cancel it as appropriate.

Simple taps with automatic shut-off

| Type of Product | References | Acoustic Class | Lap |
|-----------------|------------|----------------|-----|
| L01 Basin | 746000 | I | 18 |
| L02 A Basin | 745100 | I | 15 |

Mixers with automatic shut-off
